

Enphase Energy Launches Encharge™ Battery Storage Systems in Belgium

FREMONT, Calif., Oct. 18, 2021 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, announced today that it has started shipping its Encharge™ battery storage systems to customers in Belgium, further expanding the product's availability in the European market. Encharge battery storage systems are also currently available to customers in Germany and North America.

"We are pleased to offer battery storage systems to residential customers in Belgium, a fast-growing solar market in Europe," said Peter van Berkel, general manager of Enphase Energy Europe. "Encharge battery storage systems, along with IQ 7™ family of microinverters, offer an all-in-one solution, which allows homeowners to optimize their energy usage and reduce their energy bills. With a strong adoption rate for solar energy among Flemish homeowners, we anticipate a warm reception for the product and its capabilities."

The Encharge battery storage system offers storage configurations ranging from 3.5kWh to an aggregate 42kWh, along with the ability to upgrade through the lifetime of the system. Enphase delivers a safe solar-plus-storage solution designed to not expose installers or homeowners to high-voltage DC. The batteries feature Lithium Iron Phosphate (LFP) battery chemistry, which provides a long cycle life and safe operation through excellent thermal stability. Homeowners have insight into their systems through the Enphase Envoy™ communications gateway, which connects Enphase systems to the Enphase Enlighten™ mobile app. Encharge batteries offer over-the-air software upgrades and come with a 10-year limited warranty.

"We are eager to educate customers about the benefits of investing in battery storage systems, including cost, efficiency, and reliability," said Thomas de Meyer, business manager of DeVa Power. "Enphase has truly been an essential partner for our solar installations in Belgium. The safety and reliability of their products helps us to instill confidence in our customers that they have made the right choice for their homes."

"We have worked as a trusted partner with Enphase for more than a decade, and the majority of our solar installations have been with Enphase products," said Kristof Lassault, business owner of Lassault, KL Electric. "We tell our customers that when they purchase an Encharge battery storage system, their energy consumption can expand without cost increases. We are also pleased that Enphase offers 24/7 customer support, another benefit for our customers."

"We are noticing that people are starting to realize the benefits of generating their own energy," said Wim Dirickx, owner of Belgian Solar. "We help our customers understand the financial benefits of investing in solar. Our partnership with Enphase has lasted because we trust their long-term vision and the reliability and safety of their products, along with their excellent 24/7 customer support."

Installers in Belgium can currently buy Encharge battery storage systems from [CEBEQ](#), [GPC](#), [Natec](#), and [Solar Clarity](#).

Forward Looking Statements

This press release may contain forward-looking statements, including statements related to entering new markets, the expected capabilities and performance of Enphase Energy's technology and products, including safety, quality, and reliability, and upgradeability; the anticipated costs savings and energy generation; the adoption of our products in the markets that we target; our outstanding customer service; and the performance by our installation partners. These forward-looking statements are based on Enphase's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of certain risks and uncertainties, including those risks described in more detail in Enphase's most recent Annual Report on Form 10-K and other documents on file with the SEC and available on the SEC's website at www.sec.gov. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, or changes in its expectations, except as required by law.
