

Enphase Energy Expands IQ8 Microinverter Deployments in Pennsylvania

FREMONT, Calif., Feb. 27, 2023 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, announced today that installers of Enphase® products in Pennsylvania have seen growing deployments of Enphase Energy Systems™ powered by [IQ8™ Microinverters](#).

According to the U.S. Solar Market Insight report from Wood Mackenzie and the Solar Energy Industries Association, residential solar deployments in Pennsylvania are forecast to reach approximately 77 MW in 2023, representing a 10 percent increase from the previous year. Additionally, residential battery deployments in Pennsylvania are expected to grow over three-fold by 2026, according to the most recent U.S. Energy Storage Monitor report from the Energy Storage Association and Wood Mackenzie.

"We're seeing increased demand from homeowners in Pennsylvania who want a dependable home energy system that will ease the strain of rising energy costs, while also providing utility independence in times of an overtaxed and aging utility infrastructure," said Blake Reedy, owner of [Pennsylvania Solar Energy Company](#), an Enphase Platinum level installer. "The IQ8-enabled Enphase Energy System, which can also be equipped with battery backup, fits the bill in terms of quality, reliability, and performance."

Enphase's revolutionary IQ8-based systems can provide Sunlight Backup™ functionality during an outage even without a battery. For homeowners who want [battery backup](#), there are no sizing restrictions when pairing Enphase IQ™ Batteries with IQ8 Microinverters. With the Sunlight Jump Start™ feature, IQ8 Microinverters can restart a home energy system using only sunlight after a prolonged grid outage that drains the battery. This eliminates the need for a manual restart of the system and gives homeowners greater assurance of energy resilience. Enphase IQ8 solar microinverters are built to last and come with a 25-year limited warranty.

"Pennsylvania residents are looking for relief from historic energy rate hikes," said Adam Thau, president at [ReNu Solar & Roofing](#), an Enphase Gold level installer. "Clean energy provides a great solution to current rates and also a hedge against future rate hikes. The Enphase Energy System with IQ8 puts the power back into the hands of consumers so they can have greater peace of mind as utilities rates continue to rise."

"Our customers want a state-of-the-art home energy system that bolsters their energy resilience without needing to make sacrifices to their current energy needs," said Luke Amick, president at [SunPulse Solar](#), an Enphase Gold level installer. "With Enphase, our customers can customize a home energy system based on their personal needs and conveniently monitor and control their power consumption via the industry-leading Enphase App."

"We work with the top installers across Pennsylvania to help homeowners get a best-in-class, energy management experience," said Dave Ranhoff, chief commercial officer at Enphase Energy. "Our industry-leading platform solutions, together with 24x7 service and support provides more energy security, sustainability, and peace-of-mind for homeowners seeking to electrify their lives."

Forward-Looking Statements

This press release may contain forward-looking statements, including statements related to the expected capabilities and performance of Enphase Energy's technology and products, including safety, quality and reliability; the availability and market adoption of Enphase products; growth in deployments of Enphase Energy Systems; and growth in Pennsylvania of residential solar and battery deployments. These forward-looking statements are based on Enphase's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of certain risks and uncertainties, including those risks described in more detail in Enphase's most recently filed Annual Report on Form 10-K for the year ended December 31, 2022 and other documents on file with the SEC from time to time, which are available on the SEC's website at <https://www.sec.gov/>. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, or changes in its expectations, except as required by law.
