

Enphase Energy Expands IQ8 Microinverter Deployments in Illinois

FREMONT, Calif., March 06, 2023 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, announced today that installers of Enphase® products in Illinois have seen growing deployments of Enphase Energy Systems™ powered by [IQ8™ Microinverters](#)

According to the U.S. Solar Market Insight report from Wood Mackenzie and the Solar Energy Industries Association, residential solar deployments in Illinois are forecasted to reach approximately 132 MW in 2023, representing a 13 percent increase from the previous year. Additionally, residential battery deployments in Illinois are expected to grow over five-fold by 2026, according to the most recent U.S. Energy Storage Monitor report from the Energy Storage Association and Wood Mackenzie.

"Solar and battery solutions offer attractive savings for Illinois homeowners who are experiencing higher electricity costs," said Christi Carlson, vice president of sales at [93Energy](#), an Enphase Silver level installer. "The Enphase IQ8-powered solar system on each of our residential projects delivers value to our customers, and we are committed to helping them meet their clean energy needs. With incentives available at the federal and Illinois-state level, there's never been a better time to go solar with Enphase IQ8 Microinverter technology."

Enphase Energy's revolutionary IQ8-based systems can provide Sunlight Backup™ functionality during an outage even without a battery. For homeowners who want [battery backup](#), there are no sizing restrictions when pairing Enphase IQ™ Batteries with IQ8 Microinverters. With the Sunlight Jump Start™ feature, IQ8 Microinverters can restart a home energy system using only sunlight after a prolonged grid outage that drains the battery. This eliminates the need for a manual restart of the system and gives homeowners greater assurance of energy resilience. Enphase IQ8 solar microinverters are built to last and come with a 25-year limited warranty.

"We're pleased to provide Illinois homeowners with high-quality products," said Austin Carr, president of [Greenlink Energy Solutions](#), an Enphase Silver level installer. "Powered by the world's first microgrid-forming microinverters, the IQ8-based Enphase Energy Systems provide our customers with world-class home energy solutions and a superior customer experience."

"Our customers trust us to offer them reliable, efficient, and intelligent home energy solutions," said Tony Martin, co-founder of [Sonne Energy](#). "The state-of-the-art IQ8 Microinverters power reliable and safe solar systems. When paired with Enphase IQ Batteries, the systems can ensure clean power for homeowners, day or night."

"Our amazing network of installers is offering Illinois residents high-quality, reliable clean energy choices to power their lives at home," said Dave Ranhoff, chief commercial officer at Enphase Energy. "The Enphase Energy Systems powered by IQ8 Microinverters offers maximum control and a great customer experience, end to end."

Forward-Looking Statements

This press release may contain forward-looking statements, including statements related to the expected capabilities and performance of Enphase Energy's technology and products, including safety, quality and reliability; the availability and market adoption of Enphase products; growth in deployments of Enphase Energy Systems; and growth in Illinois of residential solar deployments and residential battery deployments. These forward-looking statements are based on Enphase Energy's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of certain risks and uncertainties, including those risks described in more detail in Enphase Energy's most recently filed Annual Report on Form 10-K for the year ended December 31, 2022 and other documents on file with the SEC from time to time, which are available on the SEC's website at <https://www.sec.gov/>. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, or changes in its expectations, except as required by law.
