

Enphase Energy Launches New IQ8 Microinverters for High-Powered Solar Modules in Austria

FREMONT, Calif., Nov. 02, 2023 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, today announced that it has started shipping IQ8™ Microinverters, with peak output AC power of 384 W, in Austria to support newer, high-powered solar modules.

This announcement follows the launch of the Enphase® [Solargraf™ platform in Austria](#). Solargraf is a cloud-based, all-in-one design and proposal software platform that is used by solar installers to help simplify and accelerate the end-to-end sales process and installation for solar customers, allowing them interactive access to design their own home energy systems.

IQ8 Microinverters are designed to maximize energy production and can manage a continuous DC current of 14 amperes, supporting higher powered solar modules through increased energy harvesting. The three new microinverters – IQ8MC™, IQ8AC™, and IQ8HC™ – feature a peak output power of 330 W, 366 W, and 384 W respectively, and are designed to seamlessly pair with a full range of solar modules up to 560 W DC. All IQ8 Microinverters activated in Austria come with a 25-year limited warranty from Enphase.

“We’re proud to provide homeowners and businesses across Austria with high-performing solar energy systems,” said Arpad Vadoc, managing director at [PBS GmbH](#). “IQ8 Microinverters enable our customers to power their lives with clean, reliable energy for years to come.”

“Homeowners in Austria are looking for ways to take control of their energy usage and gain energy independence,” said David Selmi, project manager at [DS Elektro GmbH & Co KG](#). “IQ8 Microinverters are safe, powerful, and reliable, making the most out of what the sun has to offer.”

The Enphase® Energy System™ integrates with the IQ® Gateway, which can be connected to the internet to enable over-the-air updates and connect to the Enphase® App monitoring platform. The IQ Gateway and IQ Microinverters make per-panel energy monitoring and insights for operations and maintenance simple for homeowners.

“Our customers in Austria are prioritizing not only reliability but also convenience when selecting a home energy system,” said Mario Moser, CEO at [Elektro Moser](#). “The IQ8-powered home energy system seamlessly integrates with the Enphase App for unprecedented control at the touch of a button.”

“At Enphase, we provide homeowners with industry-leading innovative solar energy systems,” said Aaron Gordon, vice president and general manager of the microinverter business unit at Enphase Energy. “We’re pleased to expand our line of products in Austria, enabling our installer partners to provide these systems capable of supporting the most powerful solar modules on the market.”

About Enphase Energy, Inc.

Enphase Energy, Inc., a global energy technology company based in Fremont, CA, is the world's leading supplier of microinverter-based solar and battery systems that enable people to harness the sun to make, use, save, and sell their own power—and control it all with a smart mobile app. The company revolutionized the solar industry with its microinverter-based technology and builds all-in-one solar, battery, and software solutions. Enphase has shipped approximately 72 million microinverters, and approximately 3.8 million Enphase-based systems have been deployed in over 145 countries. Forward-Looking Statements

This press release may contain forward-looking statements, including statements related to the expected capabilities and performance of Enphase Energy's technology and products, including safety, quality and reliability; the availability and market adoption of Enphase products in Austria;; and Enphase's ability to support newer high-powered solar modules. These forward-looking statements are based on Enphase's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of certain risks and uncertainties, including those risks described in more detail in Enphase's most recently filed Quarterly Report on Form 10-Q for the quarter ended September 30, 2023, its Annual Report on Form 10-K for the year ended December 31, 2022 and other documents on file with the SEC from time to time, which are available on the SEC's website at <https://www.sec.gov/>. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, or changes in its expectations, except as required by law.
