

Enphase Energy Begins Shipments of IQ8 Microinverters with Higher Domestic Content

FREMONT, Calif., Sept. 10, 2024 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, today announced initial shipments of IQ8HC™ Microinverters supplied from manufacturing facilities in the United States with higher domestic content than previous models. The microinverters have SKUs with a "DOM" suffix, indicating the increased amount of domestic content.

Enphase previously [announced](#) in July 2024 that certain IQ8 Microinverters when paired with other U.S.-made solar equipment could qualify for the domestic content bonus tax credit under the Inflation Reduction Act (IRA). Now, with the new IQ8 Microinverters having more components manufactured in the United States, less additional U.S.-made solar equipment is needed to meet the domestic content bonus tax credit requirements.

"The IQ8 Microinverters supplied from U.S. manufacturing facilities represent a significant milestone for Enphase and our business," said Arthur Souritzidis, CEO at Momentum Solar. "This transition aligns with our values and ensures that these state-of-the-art microinverters meet the highest standards while contributing to the growth of renewable energy in our communities."

"Manufacturing IQ8 Microinverters in the United States is a major achievement for Enphase and a testament to our focus on quality and innovation," said Ken Lima, CEO of Baywave Solar Systems. "Our customers value the reliability of Enphase products, and the fact that these microinverters are now supplied from manufacturing locations in America only enhances that trust."

"This is an exciting time for Enphase and the solar industry as a whole," said Ken Fong, vice president and general manager of the Americas at Enphase Energy. "Our customers can now more easily qualify for the domestic content bonus tax credit, which can help them scale their businesses and ultimately reach more customers. By investing in American manufacturing, we're not just creating jobs and growing the economy—we're also ensuring that our products continue to lead the industry in reliability and performance."

The domestic content bonus tax credit is only available to commercial asset owners, which includes commercial businesses adding solar and PPA/lease providers who own residential solar projects. Enphase encourages those interested in the domestic content bonus tax credit to consult their own legal and tax professionals to confirm whether qualification for the credit is applicable.
