

Enphase Energy Announces New Safe Harbor Agreement

FREMONT, Calif., Aug. 05, 2025 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, today announced a new safe harbor agreement with a solar and battery financing company that offers third-party ownership (TPO) agreements to homeowners, including leases and power purchase agreements (PPAs).

The safe harbor agreement covers Enphase's U.S.-manufactured IQ8HC™ Microinverters (with "DOM" SKUs), helping future projects preserve eligibility for both the base investment tax credit (ITC) and the domestic content bonus credit. By safe harboring equipment now, solar companies can lock in current tax credit qualifications and reduce risk from future policy changes.

"We're focused on helping solar businesses move forward with confidence," said Ken Fong, senior vice president and general manager of the Americas and APAC at Enphase Energy. "Safe harbor agreements help provide confidence in preserving both the base ITC and the domestic content bonus, giving companies time to plan, protect project economics, and continue delivering reliable, affordable clean energy to American homeowners."

Project developers should consult their own legal and tax advisors to confirm eligibility for available tax credits. Please visit the website for more information about [IQ8HC Microinverters](#) and [Enphase manufacturing](#).

About Enphase Energy, Inc.

Enphase Energy, a global energy technology company based in Fremont, CA, is the world's leading supplier of microinverter-based solar and battery systems that enable people to harness the sun to make, use, save, and sell their own power – and control it all with a smart mobile app. The company revolutionized the solar industry with its microinverter-based technology and builds all-in-one solar, battery, and software solutions. Enphase has shipped approximately 83.1 million microinverters, and more than 4.9 million Enphase-based systems have been deployed in over 160 countries. Forward-Looking Statements

This press release may contain forward-looking statements, including statements related to the ability of financiers and installers to expand deployments of IQ8 Microinverters supplied from manufacturing facilities in the United States; and statements regarding the investment tax credit and the domestic content tax bonus credit. These forward-looking statements are based on Enphase Energy's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those contemplated by these forward-looking statements as a result of such risks and uncertainties including those risks described in more detail in Enphase Energy's most recently filed Quarterly Report on Form 10-Q, Annual Report on Form 10-K, and other documents filed by Enphase Energy from time to time with the SEC. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events or changes in its expectations, except as required by law.
