Enphase Energy Launches Fourth-Generation Microinverter System in Europe

New M250 Microinverter available in EMEA markets

LYON, France--(BUSINESS WIRE)-- [Enphase Energy, Inc.](#) (NASDAQ:ENPH) today announced its fourth-generation Enphase® System is shipping in Europe. The Enphase System now includes the M250 Microinverter, which produces 250-Watts rated AC output power. In addition, the Envoy Communications Gateway, with a Wi-Fi option, connects to the Enlighten software platform to deliver a new standard in solar system intelligence and reliability.

Enphase is the number one inverter used in residential solar in the Americas, according to an [IHS report](#). The company has accelerated business momentum in its international markets as well, most notably in the UK, France and the Netherlands.

"We are excited to introduce the fourth-generation Enphase System to our customers across the UK and our core European markets," says Olivier Jacques, managing director, EMEA, for Enphase Energy. "Leveraging the successful introduction of our fourth-generation System in the U.S. last year, we continue to set the bar for inverter quality, performance and reliability in EMEA."

Enphase M250 Microinverter: Optimized for high-power solar modules, the M250 Microinverter produces 250-Watts rated AC output power and pairs with modules up to 310W. The M250 is rated at 95.7 percent EU efficiency and has been built to withstand the harshest environmental conditions. It is IP67 rated and has undergone over one million hours of testing in extreme temperature and humidity environments prior to launch. This level of quality testing and assurance is unprecedented amongst microinverters, setting a new standard for reliability in the industry. In addition, the new Enphase

System continues to be supported by an industry-leading 20-year warranty.

The new fourth-generation Enphase M250 Microinverter is available now through authorized distribution in the UK, France, Benelux, Switzerland, Germany (< 4kWp) and Italy (< 3kWp). The current M215 Microinverter will remain available for European customers in addition to the introduction of the M250.

Visit Enphase Energy at Intersolar Europe 2014 (Munich, June 4-6):

Mark Abrams, director of product management for Enphase Energy, will present the new fourth-generation Enphase Microinverter at the Electrical Energy Storage (EES) Forum organized by IBESA International Alliance at Intersolar on June

4, 11:20am, in Hall A1, Booth #B1.150.

Olivier Jacques, managing director, EMEA, for Enphase Energy, will participate at Joint Forces for Solar's [6th PV Briefing & Networking Forum Europe](#) on June 5, 4-6pm, at the Innovation Exchange Area, Hall A3, Booth #A3.550.

About Enphase Energy, Inc.

Enphase Energy delivers microinverter technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Our semiconductor-based microinverter system converts energy at the individual solar module level and brings a systems-based, high technology approach to solar energy generation. Connect with Enphase on [Facebook](#) and follow us on [Twitter](#). www.enphase.com
