Enphase Energy Reports 136% Year-Over-Year Revenue Growth in First Quarter 2012 Financial Results

- Net revenues increased to \$42.6 million from \$18.1 million year-over-year
- Gross margin increased to 21.8% from 14.7% year-over-year

PETALUMA, Calif., May 10, 2012 (GLOBE NEWSWIRE) -- <u>Enphase Energy, Inc.</u> (Nasdaq:ENPH), announced today financial results for the first quarter ended March 31, 2012.

First Quarter Financial Highlights

Net Revenues: Total net revenues for the first quarter ended March 31, 2012 grew 136 percent to \$42.6 million from \$18.1 million in the first quarter of 2011. Units sold in the first quarter of 2012 increased to 292,000, compared to 123,000 in the first quarter of 2011.

Gross Margin: Gross margin for the first quarter of 2012 was 21.8 percent, compared to 14.7 percent in the first quarter of 2011.

Net Loss: First quarter net loss was \$10.2 million, or a loss of \$5.97 per share, which compares to a net loss of \$9.3 million, or a loss of \$10.95 per share in the year-ago period. On a non-GAAP basis, the net loss was \$9.2 million for the quarter, or a loss of \$5.38 per share, compared to \$8.8 million, or a loss of \$10.40 per share, in the year-ago period. Non-GAAP results exclude stock-based compensation expense, non-cash interest expense and non-cash gains or losses due to preferred stock warrant revaluations. A reconciliation of GAAP to non-GAAP financial measures is included below.

"Our first quarter offered further evidence of how microinverters are transforming our market," said Paul Nahi, CEO of Enphase Energy. "Driven by strong demand throughout North America, revenues more than doubled over the same period last year. This underscores the fundamental advantages of microinverters, which not only produce more power, but are more reliable, safer and easier to install. By combining our proprietary semiconductor design, our cloud-based software solution along with our outsourced manufacturing model, we are applying a classic high-technology business model to the solar industry."

"In our first quarter, which is typically our seasonally softest quarter, we achieved year-over-year revenue growth of 136 percent," said Sanjeev Kumar, CFO of Enphase Energy. "Gross margins of 21.8 percent improved by over 700 basis points from the previous year. On April 4, 2012, we successfully completed our initial public offering, raising total gross proceeds of \$61.9 million."

Business Highlights

- Completed the initial public offering of 10,315,151 shares of common stock, raising total gross proceeds of \$61.9 million.
- Announced the installation of 1,440 microinverters on a solar array community project located in the town of Brewster, Mass., in March, 2012. Constructed by My Generation Energy, the system generates enough energy to power 50 homes and businesses. My Generation Energy is also currently constructing a 475kW rooftop system in Hyannis, Mass., with Enphase[®] Microinverters.
- Launched its annual North America installer tour in April, 2012. The tour travels across Canada and the United States over 80 days, visiting 33 cities and thousands of solar installers. The tour focuses on hands-on training and demonstrations of the Enphase Microinverter System.
- Expanded its European presence with the recent development of a new lab facility in Lyon, France, focused on a local test environment for its European products. The lab will allow Enphase Energy to monitor, support and ensure compliance of its products from within Europe.

Business Outlook

<u>Enphase Energy</u> expects net revenues for the second quarter of 2012 to be within a range of \$49 million to \$52 million, and for gross margin to be within a range of 21.5 percent to 23.0 percent.

Conference Call Information

Enphase Energy will host a conference call for analysts and investors to discuss its first quarter results today at 4:30 p.m. Eastern Time (1:30 p.m. Pacific Time). Open to the public, investors may access the call by dialing +1-877-644-1284, passcode 74695311. A live webcast of the conference call will also be accessible from the "Investor Relations" section of the company's website at investor.enphase.com. Following the webcast, an archived version will be available on the website for 30 days. In addition, an audio replay of the conference call will be available approximately one hour after the conclusion of the call. To hear the replay, parties in the United States and Canada should call +1-855-858-2056 and enter passcode 74695311. International parties can access the replay at +1-404-537-3406 and should enter passcode 74695311.

Forward-Looking Statements

This press release contains forward-looking statements, including, but not limited to, statements related to Enphase Energy's financial performance, market demands for its microinverters, advantages of its technology, market trends and future financial performance. These forward-looking statements are based on the company's current expectations and inherently involve significant risks and uncertainties. Enphase Energy's actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of these risks and uncertainties, which include, without limitation, risks related to: the future demands for solar energy solutions; the reduction, elimination or expiration of government subsidies and economic incentives for on-grid solar electricity applications; the company's ability to achieve broad market acceptance of its microinverter systems and to develop new and enhanced products in response to customer demands and rapid market and technological changes in the solar industry; the success of competing solar solutions that are or become available; the company's ability to effectively manage the growth of its organization and expansion into new markets and to maintain or achieve anticipated product quality, product performance and cost metrics; competition and other factors that may cause potential future price reductions for its products; the company's ability to optimally match production with demand and dependence on a limited number of outside contract manufacturers and lack of supply contracts with these manufacturers; general economic conditions in domestic and international markets; and other risks detailed in the "Risk Factors" and elsewhere in Enphase Energy's Securities and Exchange Commission filings and reports, including its Registration Statement on Form S-1 (including a prospectus) and its Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, when it becomes available. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events or changes in its expectations.

A copy of this press release can be found on the investor relations page of <u>Enphase Energy</u>'s website at <u>investor.enphase.com</u>.

About Enphase Energy, Inc.

<u>Enphase Energy</u> delivers microinverter technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Our semiconductor-based microinverter system converts energy at the individual module level and brings a system-based, high technology approach to solar energy generation. www.enphase.com

Â

(1)Â Â Â Â Â Â Â Â We present Non-GAAP net loss and Non-GAAP net loss per share as a supplemental measure of our performance. These non-GAAP financial measures exclude stock-based compensation expense, noncash interest expense and gains or losses from convertible preferred stock warrant liability revaluation. We have reconciled these non-GAAP financial measures with the most directly comparable GAAP financial measures in the table above. We believe that these non-GAAP financial measures provide meaningful supplemental information for investors regarding the performance of our business and facilitate a meaningful evaluation of our quarterly and year-to-date 2012 actual results on a comparable basis with our quarterly and year-to-date 2011 results. Our management uses these non-GAAP financial measures in order to have comparable financial results to analyze changes in our underlying business from quarter to quarter. These non-GAAP measures should be considered as a supplement to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP.
