WattzOn Announces Integration With Enphase, Providing a Complete and Engaging Home Energy Management to Enphase Residential Customers

WattzOn's EnergyCenter Now Displays Solar Production as Well as Utility Bills for Energy-Savings Results and Is Available for Residential Users Nationwide

MOUNTAIN VIEW, CA -- (Marketwired) -- 09/02/15 -- WattzOn, the leader in software-based solutions for home energy management, announced today a major enhancement to its flagship product, EnergyCenter, through the integration of solar production data from Enphase (NASDAQ: ENPH). All WattzOn users with an Enphase solar system can now benefit from WattzOn's complete home energy solution.

"Our integration of Enphase solar production data not only allows users to see how their solar system is doing, but combines solar data with utility bills," said Martha Amram, CEO. "WattzOn users with an Enphase solar system can now get a complete picture of their solar savings and use WattzOn's rich feature set to take their next steps towards even larger energy savings. We're delighted to use our national coverage of utility bill connections to support Enphase users across the U.S."

WattzOn provides its EnergyCenter through a white-label software-as-a-service (SaaS) offering to business partners, helping cities, managed properties and solar companies engage with their customers. [WattzOn's](#) tools help people save energy and water at home, through personalized savings plans, useful product and rebate information, and tips for easy habit changes. WattzOn's typical user saves nearly \$240 per year in energy costs, and participants in its [water programs](#) save an average of 9,000 gallons per year.

WattzOn's partners use its software platform to engage with customers, quickly and reliably acquire customer utility data, and increase customer uptake of key products and services, including solar.

"We're excited to see an early offering of a home energy management solution from WattzOn," said Jay Goldin, senior director of global business development at Enphase Energy. "Our goal to make solar simple and energy smart is being realized through WattzOn's integration of Enphase's solar production data, as we take the next step in moving toward a connected home future. Now, thousands of Enphase residential customers can actively save energy and money with WattzOn's solution."

WattzOn's EnergyCenter, complete with Enphase solar production data, is immediately available under a white-label offering to business partners, and is ready for all devices from mobile to desktop. This consumer-ready offering keeps customers connected to their solar installer and can increase post-installation sales and referrals.

About WattzOn

WattzOn provides web and mobile tools that help people and communities save energy and money, and is currently used in 48 states. Our platform combines software, powerful data analytics and local branding to engage residents by translating utility data into an interesting, personalized experience that delivers energy savings. WattzOn supports local programs and business partners -- with their variety of strategies and goals -- via a rich set of customization options. The platform connects to more than 200 utilities nationwide to enable data-driven targeting and tracking of energy use, savings, and savings opportunities. Product features include an energy rebate database by zip code and program-level reporting that quantifies community energy savings. Learn more at <http://www.wattzon.com>.
